## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claim 1, drawn to an electromagnetic beam chromatic shifting and directing means, classified in class 362, subclass 286.
  - Claim 2, drawn to a method of providing a spectroscopic beam of electromagnetic radiation, classified in class 356, subclass 319.
  - III. Claims 3, 4, 21, drawn to an ellipsometer system, classified in class 356, subclass 369.
  - IV. Claims 5-19, 20, 22, and 23, drawn to a spectroscopic ellipsometer, classified in class 356, subclass 369.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and [II, III, IV] are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the omission of details of the claimed subcombination ( $B_{sp}$ ) in the combination ( $AB_{br}$ ) is evidence that the patentability of the combination does not rely on the details of the specific subcombination ( $B_{sp}$ ). The subcombination has separate utility such as use in a reflectometer, interferometer, etc....

Application/Control Number: 10/613,051

Art Unit: 2877

3. Inventions II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, invention II is drawn to a method of providing a spectroscopic beam of electromagnetic radiation in which the radiation beam is directed so that the radiation decreased energy in visual wavelength and increased energy in IR and UV wavelengths; invention III relates to an ellipsometer system; and invention IV directs to a spectroscopic ellipsometer. Thus, they have different modes of operation, different functions and effects. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Page 3

- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III and IV; and vice versa, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

1,

- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa Q. Pham whose telephone number is (571) 272-2426. The examiner can normally be reached on 7:30AM to 6 PM, Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley, Jr. can be reached on (571) 272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
